EDUCATION

New York University (NYU Courant)

January 2024 – Present

Master of Science in Information Systems, GPA: 3.69/4

New York, USA

- Relevant Coursework: Fundamental Algorithms, Advanced Database Systems, DevOps and Agile Methodologies, Data Science for Business, Data Communication & Networks, Data Visualization, Innovation and Design

Mahatma Gandhi Institute of Technology

July 2019 – July 2023

Bachelor of Technology in Computer Science and Engineering

Hyderabad, India

- Relevant Coursework: Software Engineering, Operating Systems, Web Development, Real Time Systems, Cloud Computing, Java Programming, Object-Oriented Design, Data Structures, Machine Learning, Computer Networks

TECHNICAL SKILLS

Programming Languages & Web Technologies: Java, JavaScript, Python, C, C++, SQL, HTML, CSS

Frameworks & Development Tools: Spring Boot, React, Node.js, jQuery, Selenium, JUnit, Swagger, REST APIs

Cloud & DevOps: Docker, Kubernetes, OpenShift, AWS, Jenkins, GitLab CI, GitHub Actions, Splunk, Kafka

Databases & Tools: SQL Server, MySQL, PostgreSQL, DynamoDB, Tableau, Git, GitHub, GitLab, JIRA, Agile

WORK EXPERIENCE

Vervon Technologies

August 2023 – December 2023

Software Engineer

Hyderabad, India

- Built and maintained **scalable software applications** using **Java, Spring Boot, React, Node.js**, and **SQL**, supporting 3 digital transformation projects and improving workflow efficiency by 25%.
- **Developed and optimized** cloud-based solutions using **AWS (Lambda, EC2, S3, DynamoDB)** to automate 50+ workflows, reducing manual effort by 30%.
- **Designed and tested** RESTful APIs, improving **response times by 40%** and enabling seamless **front-end/back-end integration**.
- Contributed to **back-end architecture decisions**, implemented **modular service layers**, and improved **application maintainability** through best coding practices.

Vervon Technologies

January 2023 – July 2023

Software Engineer Intern

Hyderabad, India

- **Collaborated** with a cross-functional team following **Agile** practices to **enhance** client-facing web applications using **React** (front-end) and **Java Spring Boot** (back-end).
- **Engineered and integrated** RESTful APIs that **improved data flow efficiency by 20%** and reduced manual data processing.
- **Implemented** comprehensive unit and integration tests (**JUnit, Mockito**) and **participated** in code reviews to **elevate code quality** and maintainability.
- Gained exposure to **AWS** and **DevOps** best practices (**CI/CD, Docker**), streamlining deployments and enhancing application reliability.

PROJECTS

NYU DevOps Inventory Service (Python, Flask, Docker, Kubernetes, Tekton, GitHub Actions, PostgreSQL)

- Developed a **RESTful inventory microservice** with **CRUD operations**, API documentation (**Flask-RESTX & Swagger**), and **95%+ test coverage** using pytest.
- Automated **CI/CD pipelines** with GitHub Actions & Tekton, enabling seamless deployments on **K3s & OpenShift**, while following **Agile/Scrum methodologies** for iterative development.

Peer-to-Peer Carpooling DApp (Solidity, Web3.js, Node.js, React, MongoDB)

- Crafted a **decentralized ride-sharing DApp** using **Solidity**, ensuring **30% more secure** ride payments through **tamper-proof smart contracts**.
- Integrated **React, Web3.js, Node.js**, and **MongoDB** for **real-time ride matching** & blockchain interaction.

CERTIFICATIONS & PUBLICATIONS

Certifications: Data Structures(Java), Full Stack Web Development(React, Node.js), Data Science, Social Networks.

Publication: **Peer-to-Peer Carpooling DApp**, IJAEM (Vol. 05, Issue 07), DOI: 10.35629/5252-0507858869 Researched and implemented a blockchain based carpooling app for enhanced privacy, security and transparency.
