EDUCATION

New York University (NYU Courant)

January 2024 – January 2026

Master of Science in Information Systems, **GPA: 3.7/4**

New York, USA

SKILLS

Programming Languages: Java, Python, JavaScript, TypeScript, SQL, C/C++, HTML/CSS

AI, Backend & Web: Spring Boot, FastAPI, Flask, React, Node.js, REST APIs, GraphQL, LangChain, OpenAI API, LLMs, RAG

Cloud & Infrastructure: AWS (Lambda, ECS, EC2, S3, SQS, DynamoDB), Docker, Kubernetes, OpenShift, GCP, Linux

DevOps, Testing & Reliability: GitHub Actions, Jenkins, GitLab CI, Tekton, JUnit, Mockito, PyTest, TDD, CI/CD, Monitoring

Databases & Distributed Systems: PostgreSQL, MySQL, MongoDB, DynamoDB, Redis, Kafka, RDS, Oracle, Vector Search, Caching

WORK EXPERIENCE

Vervon Technologies

January 2023 – December 2023

Software Engineer

Hyderabad, India

- Owned end-to-end delivery of **cloud-native CRM workflow modules** using **React, Spring Boot, AWS ECS, and DynamoDB**, improving B2B client workflow efficiency by **25%**.
- Built **customer onboarding and KYC automation services** with **React UIs, Spring Boot APIs, AWS Lambda, S3, and DynamoDB**, reducing manual intake effort by **30%**.
- Designed, documented, and optimized **RESTful APIs** for internal workflow automation, improving service response times by **40%** and strengthening frontend-backend integration.
- Automated **CI/CD pipelines** with **GitHub Actions, Docker, and Jenkins**, reducing deployment time by **40%** and improving release reliability across staging and production.
- Improved production readiness by writing **JUnit and Mockito** unit/integration tests, participating in peer code reviews, and containerizing backend services with **Docker**, reducing post-release defects by **30%**.

PROJECTS

Deployed AI Knowledge Assistant (Python, FastAPI, LangChain, OpenAI API, Vector Search, Docker, AWS)

- Developed and deployed a **production-ready retrieval-augmented AI product** used by **500+ users** to search, summarize, and ask questions across large document collections with grounded responses.
- Designed **document ingestion, chunking, embeddings, semantic retrieval, prompt orchestration, and REST API workflows**, reducing manual document review time by **65%**.
- Implemented **LLM evaluation, response validation, error handling, caching, and Dockerized deployment**, improving answer reliability, latency, and developer productivity.

Distributed Chat Application (JavaScript, Node.js, Redis, Socket.io, MongoDB, HAProxy, Docker)

- Engineered a **horizontally scalable real-time messaging system** supporting unicast, multicast, and broadcast communication using Socket.io, Redis pub/sub, and MongoDB.
- Configured **HAProxy load balancing, Redis caching, and Docker Compose deployments**, enabling low-latency messaging for **10,000+ concurrent users**.

OPEN SOURCE

Open Source Contributions

GitHub

- Contributed **25+ merged pull requests** across open-source AI, backend, and developer tooling repositories, improving documentation, tests, API reliability, and developer onboarding.
- Fixed production-facing issues in public repositories by improving **error handling, unit tests, CI workflows, REST API validation, and Docker-based local development**.
- Maintained public projects demonstrating **AI applications, distributed systems, cloud-native deployment, CI/CD automation, TDD, and scalable backend engineering**.
